

Project Executable Files

Date	30 June 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Project Executable Files

This section contains all the executable and deployment files required for the Credit Card Approval Prediction project. The project includes the complete Flask application source code, trained machine learning model, preprocessing files, dataset, HTML templates, static resources, and dependency files. All files are properly organized and documented to ensure the evaluator can successfully run the application, generate credit card approval predictions, and verify the project functionality by following the provided setup instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA

9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Credit Card Approval Prediction/

```

|
├── app.py
├── model.pkl
├── scaler.pkl
├── label_encoders.pkl
├── clean_data.csv
├── requirements.txt
├── README.md
|
├── templates/
|   ├── index.html
|   └── result.html
|
├── static/
|   ├── style.css
|   └── images/
|
└── screenshots/
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed (Runs on Localhost)
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Local Flask Server
Repository Link	https://github.com/shaikshaguftharabbani/Credit-Card-Approval-Prediction
Demo Video Link	https://drive.google.com/file/d/1WRTylGqXzHGJyH-DF8TeqNMKHaLoMr9s/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

❑ Install **Python 3.10+** on your system.

❑ Install all required libraries using:

```
pip install -r requirements.txt
```

❑ Ensure the following files are in the project folder:

- app.py
- model.pkl
- scaler.pkl
- label_encoders.pkl
- clean_data.csv

❑ Run the application:

```
python app.py
```

❑ Open the browser and visit:

```
http://127.0.0.1:5000
```

❑ Enter applicant details and click **Predict** to view the credit card approval result.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Application runs only on the local Flask server	Can be deployed on Render or Heroku in future
2	Prediction accuracy depends on training dataset quality	Improve dataset and retrain the model
3	No user authentication or database support	Can be added in future versions
