Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Enter Application Details	Stage 2 Credit Card Approval Prediction	Stage 3 View Prediction Result
Actions <i>What does the customer do?</i>	- Opens the web application. - Enters personal and financial details. - Clicks the Predict button.	- System validates the input. - Data is processed (encoding and scaling). - ML model predicts approval status.	- Views the prediction result. - Understands approval or rejection. - Decides the next step.
Touchpoint <i>What part of the service do they interact with?</i>	- Web form (index.html). - Input fields for details. - Submit/Predict button.	- Flask backend (app.py). - Machine Learning model (model.pkl). - Preprocessing (scaler.pkl and encoders).	- Result page (result.html). - Approval/Rejection message. - User interface displaying outcome.
Customer Thought <i>What is the customer thinking?</i>	- Is my information correct? - Will I qualify for a credit card? - Is my data safe and secure?	- I hope the system prediction is accurate. - The process should be fast and reliable. - I trust the machine learning model.	- Why was I approved or rejected? - What can I do to improve my approval chances? - What should I do next?
Customer Feeling <i>What is the customer feeling?</i>	- Hopeful. - Curious. - Slightly nervous while submitting details.	- Anxious while waiting for the result. - Confident that the system will give the right decision. - Expectant.	- Happy if approved. - Disappointed if rejected. - Motivated to improve eligibility next time.
