Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A user or organization that provides or receives data from the system. Example: Applicant/User, Bank/Admin.
Rectangle with numbered header	Process	An activity that processes the input data. Example: Enter Applicant Details, Data Preprocessing, Credit Card Approval Prediction, Display Result.
Rectangle (solid fill, no number)	Data Store	Stores the data or files used by the system. Example: model.pkl, scaler.pkl, label_encoders.pkl, clean_data.csv.
Labeled arrow	Data Flow	Represents the movement of data between entities, processes, and data stores. Example: Applicant Details, Processed Data, Prediction Result, Approval/Rejection Status

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

Data Flow Diagram – Credit Card Approval Prediction
