

Project Demo Planning

Date	1 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning

The demo of the **Credit Card Approval Prediction** project is planned to present the problem statement, solution approach, machine learning model, and Flask-based web application. Each of the five team members is assigned a specific role to demonstrate the project features, explain the implementation, present the results, and answer questions, ensuring a clear and well-organized presentation.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, explain the importance of credit card approval prediction, and discuss challenges in manual approval processes.	2	Team Leader
2	Solution Overview	Explain the system architecture, dataset, machine learning model, preprocessing, and overall workflow.	3	Member 2
3	Live Feature Demonstration	Demonstrate the web application by entering applicant details and showing the prediction result (Approved/Rejected).	4	Member 3
4	Code Explanation	Explain the implementation of app.py, model loading, preprocessing, prediction logic, and Flask integration.	3	Member 4
5	Testing, Results & Conclusion	Present testing results, model performance, future enhancements, and conclude the project.	2	Member 5

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for an automated credit card approval prediction system.
2	Solution Overview	Describe the dataset, preprocessing, machine learning model, and Flask application.
3	Live Feature Demonstration	Enter sample applicant details and display whether the credit card is approved or rejected.

4	Code Walkthrough	Briefly explain the app.py workflow, model prediction, and result generation.
5	Results & Performance	Show prediction accuracy and discuss testing outcomes.
6	Q&A Session	Answer evaluator questions and explain future improvements.
